

Specification of native human calprotectin in PBS, 0.09 % NaN₃, sterile filtered.

Composition and stability information:
Source: Human leukocytes Solution: PBS, 0.09 % NaN ₃ Stability: 12 months at -80 °C Shipping conditions: Dry ice Size: 1 mg

Technical information:		
Requirement:	Acceptance criteria:	Method:
Appearance	Clear and colorless solution	Visual inspection
Protein concentration	≥ 1.0 mg/ml	Biuret method
Purity	≥ 90 %	SDS PAGE
Viral test	Negative for Hepatitis B (antigen), Hepatitis C (antibodies), HIV I and II (antigen and antibodies), HTLV I/II and syphilis.	External accredited lab

Safety information:
Not for human or animal use.
